E6_E7 Copying of Figures

<Each drawn figure is graded as intact (1) or impede (0), and grades for both figures are added up. A total grade of 2 means the figure is passed.

Flags: The design contains five elements: (1) upper triangle, (2) upper vertical line, (3) 'v' shape towards the right, (4) lower vertical line, and (5) lower square. A figure was graded as not intact if there were major distortions in the shape or orientation of more than one element. Errors in the individual elements' shape or the whole design were not considered when grading. The complete rotation of the design was considered acceptable if all five elements were present in correct relation among them.

Triangle: The design contains three elements: (1) outer triangle, (2) open rectangle vertically oriented, and (3) closed rectangle horizontally oriented. The figure was graded as intact only if the three elements were present. The rotation of the whole design was considered acceptable if all three elements were present in the correct relationship among them.>
